

COACHELLA VALLEY CONSERVATION COMMISSION FINANCE COMMITTEE AGENDA

MONDAY, JANUARY 5, 2026 2 p.m.

Coachella Valley Association of Governments 74-199 El Paseo, West Building, Suite 100 Palm Desert, CA 92260

Public Comment is encouraged to be emailed to the Finance Committee prior to the Meeting at cvaq@cvaq.org by 5:00 p.m. on the day prior to the committee meeting.

THIS MEETING IS HANDICAPPED ACCESSIBLE. ACTION MAY RESULT ON ANY ITEMS ON THIS AGENDA.

	B. CVCC's Unaudited Financial Reports through September 30, 2025	P72
5.	INFORMATION ITEMS A. CVCC's Quarterly Investment Report through September 30, 2025	P71
	 Authorize a \$300,000 adjustment to the Fiscal Year 2025-26 budget to address immediate research needs, anticipated legal expenses and administrative expenses related to burrowing owl management; and Approve Amendment No. 2 to the Services Contract with Dr. Conway's laboratory at the University of Idaho, providing an additional \$292,489.15 to the contract and extending burrowing owl monitoring activities through December 2026 	
	B. Budgetary Impacts Related to Burrowing Owl Coordination and Research – Kathleen Brundige Recommendation: To address the concerns related to the burrowing owl and provide any coordination with wildlife agencies:	P64
	A. CVCC's Audit for Fiscal Year 2024-25 and Related Reports – Jiajing Cheng Recommendation: Receive and file the Audited Financial Statements for the fiscal year ended June 30, 2025, Report on Internal Controls over Financial Reporting, and the Auditor's Communication with Those Charged with Governance	P7
4.	DISCUSSION /ACTION	
3.	CONSENT CALENDAR A. Approve the minutes of the May 29, 2025, meeting of the Finance Committee	P5
2.	PUBLIC COMMENTS ON AGENDA ITEMS This is the first of two opportunities for public comment. Any person wishing to address the Finance Committee on items appearing on this agenda may do so at this time. At the discretion of the Chair, comments may be taken at the time items are presented. Please limit comments to three (3) minutes.	
1.	<u>CALL TO ORDER</u> – Mayor Pro Tem Gary Gardner, Chair, City of Desert Hot Springs Roll Call Agenda Modifications Conflict of Interest Disclosure	P4

6. PUBLIC COMMENTS ON NON-AGENDA ITEMS

This is the second opportunity for public comment. Any person wishing to address the Finance Committee on items of general interest within the purview of this Committee may do so at this time. Please limit comments to two (2) minutes.

7. ANNOUNCEMENTS

The next meeting of the Coachella Valley Conservation Commission will be held on Thursday, January 8, 2026, at 10:30 a.m. at the Coachella Valley Water District Steve Robbins Administration Building Training Room, 75515 Hovley Lane East, Palm Desert, 92260.

8. ADJOURNMENT

Coachella Valley Conservation Commission FINANCE COMMITTEE Member Roster

City of Desert Hot Springs	Mayor Pro Tem Gary Gardner, CVCC Chair
City of Indio	Mayor Elaine Holmes, CVCC Vice Chair
City of La Quinta	Mayor Linda Evans
City of Palm Desert	Mayor Evan Trubee
City of Indian Wells	Finance Director Kevin McCarthy

Staff	
Tom Kirk, Executive Director	
Claude Kilgore, CVCC Auditor/ Director of Finance	
Kathleen Brundige, Director of Conservation	

Coachella Valley Conservation Commission Finance Committee Meeting Minutes May 29, 2025

 CALL TO ORDER / ROLL CALL – The meeting was called to order by Chair Gary Gardner, City of Desert Hot Springs, at 1:01 p.m. at the Coachella Valley Association of Governments, located at 74-199 El Paseo Dr., Suite 100, Palm Desert, 92260.

ROLL CALL – Roll call was taken, and it was determined that a quorum was present.

Members Present

Mayor Pro Tem Gary Gardner, *Chair*Mayor Pro Tem Elaine Holmes, *Vice Chair**Mayor Linda Evans
Mayor Pro Tem Evan Trubee
Finance Director Kevin McCarthy

*Arrived at Item 4A

Jurisdiction

City of Desert Hot Springs City of Indio City of La Quinta City of Palm Desert City of Indian Wells

2. PUBLIC COMMENTS ON AGENDA ITEMS

None

3. CONSENT CALENDAR

IT WAS MOVED BY MAYOR EVANS AND SECONDED BY DIRECTOR MCCARTHY TO:

A. Approve the minutes of the December 16, 2024, meeting of the Finance Committee

THE MOTION CARRIED WITH 3 AYES, 1 ABSTENTION, AND 1 MEMBER ABSENT.

4. DISCUSSION / ACTION

A. Fiscal Year 2025-26 Draft Agency-Wide, Programs, and Individual Funds Budget

Finance Director Claude Kilgore presented the staff report providing details on the draft 2025-26 Agency-Wide budget, including a projected increase in the land acquisition budget and expected grant revenue to fund studies and programs.

Brief member discussion ensued with Mr. Kilgore answering questions from the committee regarding the budget.

IT WAS MOVED BY MAYOR EVANS AND SECONDED BY FINANCE DIRECTOR MCCARTHY TO RECOMMEND THE COMMISSION APPROVE THE BUDGET

THE MOTION CARRIED WITH 5 AYES AND 0 MEMBER ABSENT.

Mayor Pro Tem Gary Gardner	Aye
Mayor Pro Tem Elaine Holmes	Aye
Mayor Linda Evans	Aye
Mayor Pro Tem Evan Trubee	Aye
Finance Director Kevin McCarthy	Aye

5. INFORMATION ITEMS

- A. Expected Extension of Engagement with CVCC's Independent Auditor
- B. Update on the Enterprise Resource Planning (ERP) Project
- C. Unaudited investment report through March 2025

These items were placed in the agenda for members' information.

6. PUBLIC COMMENTS ON NON-AGENDA ITEMS

None

7. ANNOUNCEMENTS

The next meeting of the Coachella Valley Conservation Committee will be held on Thursday, June 12, 2025, at 10:30 a.m. at the CVAG Conference Room, 73-710 Fred Waring Drive, Suite 104 in Palm Desert.

8. ADJOURNMENT

Chair Gardner adjourned the meeting at 1:39 p.m.

Respectfully submitted,

Ely Regalado Management Analyst

Coachella Valley Conservation Commission Finance Committee January 5, 2026

STAFF REPORT

Subject: CVCC's Audit for Fiscal Year 2024-25 and Related Reports

Contact: Jiajing Cheng, Senior Accountant (<u>icheng@cvag.org</u>)

<u>Recommendation</u>: Receive and file the Audited Financial Statements for the fiscal year ended June 30, 2025, Report on Internal Controls over Financial Reporting, and the Auditor's Communication with Those Charged with Governance

<u>Background:</u> CVCC has engaged the Coachella Valley Association of Governments (CVAG) to provide staffing and other administrative tasks since its inception. CVAG's Financial Statements Audit Procurement Policy, adopted on June 3, 2002, requires CVAG to obtain from qualified auditing firms, proposals to perform CVAG's annual financial audit every five years. In June 2021, CVAG selected Davis Farr LLP as the independent auditor for CVAG, CVCC, and Desert Community Energy (DCE) for a five-year term beginning in Fiscal Year 2020–21. In spring 2025, CVAG approved a one-time extension to add a sixth year to the engagement to ensure auditor continuity during the implementation of CVAG's Enterprise Resource Planning (ERP) system, which also serves as CVCC's financial system.

Davis Farr LLP performed the annual audit over CVCC's Basic Financial Statements as of June 30, 2025, and for the fiscal year then ended which included the Government-Wide Financial Statements including the Statement of Net Position and Statement of Activities as well as Fund Financial Statements which include Balance Sheet – Governmental Funds, Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Position, Statement of Revenues, Expenditures and Changes in fund Balance – Governmental Funds, Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities, and Notes to the Basic Financial Statements. Davis Farr issued an Unmodified Opinion on December 18, 2025, which means that CVCC's Basic Financial Statements present fairly, in all material respects, the respective financial position of CVCC as of June 30, 2025 for the year then ended in accordance with US GAAP (Generally Accepted Accounting Principles).

In accordance with Government Auditing Standards, Davis Farr also issued a report on their consideration of CVCC's internal control over financial reporting and their tests of CVCC's compliance with certain provisions of laws, regulations, contracts, and grant agreements as well as other matters; Davis Farr was not engaged to provide an opinion on internal control over financial reporting or on compliance. During its testing, Davis Farr did not identify any material weaknesses or significant deficiencies in internal controls. Finally, Davis Farr has provided a letter to the Commission outlining Significant Audit Findings as promulgated by AU-C Section 260, "The Auditor's Communication with Those Charged With Governance."

For Fiscal Year 2024/25, CVCC's net position increased by approximately \$5.6 million, representing a 4.3 percent increase from the prior year. This change in net position reflects a 4.5 percent or \$4.1 million increase in investment in capital assets as well as about \$1 million or 4.2 percent increase in cash and investments. Total revenue increased by nearly \$2.2 million, or 35.1 percent, primarily due to Caltrans providing advanced mitigation funding for new projects in 2025. Total expenses increased by approximately \$900,000, or 46.9 percent, compared to the prior fiscal year, largely attributable to work performed by external consultants and much of it reimbursable by corresponding grant revenue.

A member of the Davis Farr team will present the reports to the Finance Committee at its January meeting and be available to address any questions or comments. The audit will then be presented to the full Commission at its January 8, 2026 meeting.

<u>Fiscal Analysis:</u> There is no additional cost to receiving and filing the audit reports. The professional fees associated with the audit were previously budgeted.

Independent Auditor's Report

To the Commission Members Coachella Valley Conservation Commission Palm Desert, California

Report on the Audit of the Financial Statements

Opinions

We have audited the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of Coachella Valley Conservation Commission (Commission), as of and for the year June 30, 2025, and the related notes to the financial statements, which collectively comprise the Commission's basic financial statements as listed in the table of contents.

In our opinion, the accompanying financial statements present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the Commission, as of June 30, 2025, and the respective changes in financial position for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS) and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Commission and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Commission's management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about Commission's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Commission's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Commission's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison schedules be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Report on Summarized Comparative Information

We have previously audited the Commission's 2024 financial statements, and we expressed unmodified audit opinions on those audited financial statements in our report dated November 18, 2024. In our opinion, the summarized comparative information presented herein as of and for the year ended June 30, 2024 is consistent, in all material respects, with the audited financial statements from which it has been derived.

Supplementary Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Commission's basic financial statements. The *combining nonmajor* fund financial statements are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining nonmajor fund financial statements are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining nonmajor fund financial statements are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 18, 2025, on our consideration of the Commission's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the Commission's internal control over financial reporting and compliance.

DavisFarrup

Irvine, California December 18, 2025 This page intentionally left blank

The following is a discussion and analysis of Coachella Valley Conservation Commission's (CVCC or the Commission) financial performance and includes a summary of CVCC's financial statements coupled with a detailed analysis of CVCC's financial position and results of operations for the fiscal year ended June 30, 2025, with comparative information from the fiscal year ended June 30, 2024. The purpose of management's discussion and analysis (MD&A) is to help CVCC member agencies and other stakeholders understand what the financial statements and notes in this financial report say about Commission's financial health and why it has changed since last year. It contains information drawn from those other parts of the report, accompanied by explanations informed by CVCC staff's knowledge of the Commission's finances. Please read this discussion and analysis in conjunction with the financial statements, including the notes to the financial statements identified in the accompanying tables.

If you have any questions about this report or require further information, contact CVCC which is staffed by the Coachella Valley Association of Governments (CVAG) at 760.346.1127 and ask for the Director of Finance.

OVERVIEW OF THE FINANCIAL STATEMENTS

The annual report consists of three parts - management's discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements that present different views of the Commission:

- The first two statements are government-wide financial statements that provide both long-term and short-term information about the Commission's overall financial status.
- The remaining statements are fund financial statements that focus on individual parts of
 the Commission government, reporting the Commission's operations in more detail than
 the government-wide statements. As their name implies, the fund financial statements
 disaggregate financial information by separate funds to report on the specific purposes for
 which resources are used or for which they are restricted. The Commission reports all of its
 governmental activities in governmental funds which include the general fund as well as
 special revenue funds.

The financial statements also include *notes* that delve deeper into the Commission's finances as reported in the basic financial statements. The information in the notes is as important to understanding the information in the financial statements as the statements themselves. The Commission uses notes to (1) present information in greater details than is possible within the financial statements, (2) explain the nature of amounts reported in the financial statements and how those amounts were determined, and (3) report certain information that does not meet the requirements for inclusion in the financial statements (such as certain commitments). The statements and notes are followed by a section of *required supplementary information and notes to required supplementary information* that provide additional financial and budgetary-to-actuals information.

Types of Information in the Financial Statements

The government-wide financial statements use the economic resources measurement focus and accrual basis of accounting much like how private sector financial statements are presented. In other words, they comprehensively report all types of financial statement elements:

- Assets resources that the Commission controls, which are mostly in the form of land.
- Liabilities amounts the Commission owes to others such as to vendors for work performed but not yet paid.
- Revenues and Expenses inflows and outflows of resources, respectively, related to the current year like grant revenue and related expenses.

More detail about the measurement focuses and basis of accounting can be found in Note 1 of the notes to the financial statements, the summary of significant accounting policies.

Governmental fund financial statements use the *current economic resources measurement focus* and modified accrual basis of accounting to report on the sources, uses, and balances of current financial resources. The Commission's basic services such as management and monitoring of protected habitat are reported in governmental funds, which focus on how money flows into and out of those funds and the balances left at year end. The governmental funds do not report non-financial assets, such as capital assets, but they do report the flows of current financial resources related to those long-term items like the spending of cash to acquire land. In general, the governmental fund statements provide a detailed short-term view of the Commission's general government operations and the basic services it provides as opposed to the comprehensive, long-term view provided in the government-wide financial statements referenced above.

ANALYSIS OF THE COMMISSION'S FINANCES

Statement of Net Position (amounts expressed in thousands)

	 al Year 025	 cal Year 2024	Dollar	Change_	Percent Change
Current and Other Assets Capital Assets Total Assets	\$ 42,791 94,895 137,685	\$ 41,070 90,818 131,887	\$ 	1,721 4,077 5,798	4.2% 4.5% 4.4%
Current Liabilities Total Liabilities	 778 778	580 580		198 198	34.1% 34.1%
Investment in Capital Assets Restricted Unrestricted Total Net Position	\$ 94,895 35,537 6,475 136,907	\$ 90,818 35,034 5,455 131,307	\$	4,077 503 1,020 5,600	4.5% 1.4% 18.7% 4.3%

Note: Totals may not sum precisely due to rounding differences.

The table above demonstrates that as of June 30, 2025, the Commission's total net position – assets minus liabilities – was about \$137 million, an increase of \$5.6 million or 4.3 percent compared with 2024. This change in net position reflects a 4.5 percent or \$4.1 million increase in investment in capital assets as well as about \$1 million or 4.2 percent increase in cash and investments. All the increase in net position was the result of the financial performance of the governmental activities as the Commission has no business-type activities. The following sections of the MD&A analyze the finances of the governmental activities.

A summary of the government-wide statement of activities follows:

Statement of Activities (amounts expressed in thousands)

`	Fiscal Year 2025				_ Dolla	r Change	Percent Change	
Program Revenues: Operating contributions and grants Capital contributions and grants General Revenues:	\$	2,657 3,685	\$	1,515 2,725	\$	1,142 959	75.4% 35.2%	
Investment Earnings Other revenues Charges for Services Total Revenues		2,051 53 6 8,452		1,999 18 - 6,257		52 35 6 2,195	2.6% 194.4% 100.0% 35.1%	
Program Expenses: Administrative Biological monitoring and land		999		794		204	25.7%	
management program		1,853		1,148		706	61.5%	
Total Expenses Changes in Net Position Net Position - Beginning of Period		2,852 5,600 131,307		1,942 4,315 126,991		910 1,285 4,315	46.9% 29.8% 3.4%	
Net Position - End of Period	\$	136,907	\$	131,307	\$	5,600	4.3%	

Note: Totals may not sum precisely due to rounding differences.

The Statement of Activities shows that in fiscal year 2025, governmental revenues of around \$8.5 million exceeded expenses of about \$2.9 million resulting in the \$5.6 million increase in net position. Various activities contributed to this increase in net position. The primary drivers were capital and operating contributions from the California Department of Transportation (Caltrans) as part of its obligations to the Commission for mitigation, the reinstatement and collection of tipping fees from the Coachella/Indio Waste Transfer Authority (CIWTA), and grants for the biological monitoring program. These items and other governmental activities will be discussed next.

Increases in Program Revenues

During fiscal year 2025, there was a significant increase in both operating and capital contributions and grants. The total revenue increased by nearly \$2.2 million, from \$6.3 million to \$8.5 million, representing approximately a 35.1 percent increase from the previous year. This increase is due to Caltrans providing advanced mitigation funds for new projects in 2025; no revenue was received from Caltrans in 2024. Furthermore, Local Development Mitigation Fee collections declined by approximately \$0.6 million in 2025 compared to 2024. However, this reduction was largely compensated by the reinstatement and collection of tipping fees from the CIWTA, which contributed a comparable amount. Additionally, external grant revenue totaling about \$0.4 million was received to support expenses associated with biological monitoring.

Increases in Expenses

Total expenses increased in fiscal year 2025 by 46.9 percent or \$0.9 million. This increase was largely attributable to work performed by external consultants, particularly those that perform biological monitoring and apportion of these costs have been reimbursed by grants as indicated in the section above. In addition there were also higher administrative costs from the Coachella Valley Association of Governments (CVAG) who staffs the Commission. The increase was primarily attributable to the addition of a new position during the year, with the associated costs largely offset by grant reimbursements.

Governmental Funds

The Commission reports three major funds individually in the governmental funds financial statements. Those funds are the general fund, the management and monitoring fund, and the land acquisition fund which will now be discussed in more detail.

General Fund - The General Fund accounts for all the general revenues of the Commission not specifically levied or collected for some special purpose, and for the expenditures related to the rendering of general services by the Commission. The current fiscal year's net excess was about \$1.4 million, bringing the ending fund balance of the General Fund to \$17.4 million which is mostly restricted for endowment purposes. One of the key drivers to the net excess included the reinstatement of tipping fees from CIWTA as well as tipping fees from the County of Riverside which amounted to nearly \$1.0 million combined in 2025. Other significant revenues included \$500 thousand from CVAG for endowment purposes and a portion of the funds from Caltrans referenced above as required under the Coachella Valley Multiple Species Habitat Conservation Plan (CVMSHCP). Additionally, the Commission's investments in the Riverside County Treasurer's Pooled Investment Fund saw another year of strong yields.

Management And Monitoring Fund - The Management and Monitoring Fund accounts for the revenues associated with implementation of land management and biological monitoring programs for the CVMSHCP. The current fiscal year saw a net decrease in fund balance by \$0.2 million, bringing the total ending fund balance to nil. One contributing factor to this decrease relates to the Commission adopted Local Development Mitigation Fees (LDMF) ordinance which designates part of these fees collected to be used for Management and Monitoring expenditures. Current year revenue in the management and monitoring fund was about \$0.5 million, a decrease of about \$0.1 million from the amount received as revenue in fiscal year 2024. Although there was an increase in the base calculation for LDMF, there was an overall decrease in collections because there were fewer projects permitted in previously undisturbed lands that needed to mitigate impacts to wildlife habitat. Additionally, Consultant fees from CVAG also increased due to additional resource needs; as the Commission continues to acquire more land, the costs associated with management and monitoring will continue to rise.

Land Acquisition Fund - The Land Acquisition Fund accounts for land acquisitions under the CVMSHCP with revenues typically generated by LDMF as well as other ad-hoc agency mitigation fees from various agencies based on their CVMSHCP obligations. The current fiscal year's fund balance was \$18.8 million, remaining relatively stable from 2024. The fund was supported by about \$2.3 million in LDMF and \$1.2 million in agency mitigation fees from Caltrans. The LDMF represented a decrease of about \$0.5 million from 2024 while the agency mitigation fees increased by 100 percent due to the new agreement with Caltrans mentioned above. Overall, capital outlay necessary to accomplish CVMSCP land acquisition objectives increased by about \$0.8 million.

SIGNIFICANT CAPITAL ASSET AND LONG-TERM FINANCING ACTIVITY

Capital Assets

Capital Assets Net of Depreciation (amounts expressed in thousands)

		nce June 0,2025		nce June 0,2024	CI	nange	Percent Change		
Land	\$	91,661	\$	87,808	\$	3,853	4.4%		
Land Improvement		2,976		3,007		(30)	(1.0)%		
Building and Improvement		213		213		_	213		100.0%
Equipment		31		3		28	933.3%		
Construction in Progress		13		<u> </u>		13	100.0%		
Total	\$	94,895	\$	90,818	\$	4,077	4.5%		

Note: Totals may not sum precisely due to rounding differences.

Overall, the carrying value of the Commission's capital assets – original cost minus accumulated depreciation – increased by about \$4 million or roughly 4.5 percent. The main driver for this increase was the acquisition of additional land parcels by the Commission to the tune of almost \$4 million. One of the parcels contains buildings, equipment, and other improvements. The Peninsular Bighorn Sheep Fence Project recorded depreciation of about \$0.1 million which offset additions to and reduced Land Improvements to below \$3.0 million. The construction in progress is related to post and cable fences being constructed for land management.

Significant Long-Term Financing Activity

During the fiscal year 2025, there were no significant long-term financing activities undertaken.

CURRENTLY KNOWN FACTS, DECISIONS, OR CONDITIONS

The Commission has identified several relevant factors that will influence the Commission's finances in the future and have either been included in the fiscal year 2026 budget or will be included in a future budget:

• **Grant Awards** - The Commission expects to receive additional external grant funding for management and monitoring and is the recipient of a \$0.5 million grant from CalRecycle for cleanup and abatement of reserve lands, of which around \$0.3 million is expected in fiscal year 2025–2026. Additionally, the two-year Wildlife Connectivity Assessment for Interstate 10 and Closely Associated Transportation Infrastructure in the Banning Pass was awarded to the CVCC, representing the largest non-acquisition grant since the inception of the CVMSHCP, from the California Department of Fish and Wildlife's 30×30 implementation. Roughly \$0.3 million is budgeted for receipt in 2025–26. Another \$150 thousand in revenue is budgeted to cover Motus tower array costs and small mammal genetics. Total grants expected in 2025–2026 are nearly \$0.9 million and would represent a significant increase from fiscal year 2024- 2025.

• **Western Burrowing Owl Costs** – CVCC has recently faced a significant compliance issue regarding the western burrowing owl. Federal and state wildlife agencies have raised concerns about permit obligations, with a potential state listing decision pending in early calendar year 2026. Despite major investments in land acquisition and habitat protection, CVCC must now demonstrate effective long-term conservation strategies, including updated population data, relocation effectiveness, and habitat management, to maintain compliance and ensure the species' viability. This will likely result in an administrative, legal and management and monitoring cost increase of at least \$300,000 in the coming years.

CONTACTING THE COMMISSION'S FINANCIAL MANAGEMENT

This financial report is designed to provide citizens, member agencies, and resource providers with a general overview of the Commission's finances and to show the Commission's accountability for the money it receives. If you have questions about this report or need additional financial information, contact the Commission's Office staffed by the Coachella Valley Association of Governments, attention: Finance Department, at 74-199 El Paseo, Suite 100, Palm Desert, CA 92260 or by calling 760.346.1127 and asking for the Director of Finance.

NOTES TO THE BASIC FINANCIAL STATEMENTS

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 1: Summary of Significant Accounting Policies

(a) <u>Description of Reporting Entity</u>

The Coachella Valley Conservation Commission (the Commission) was formed under California's Joint Powers Law on December 1, 2005 for the purpose of overseeing and administering the Coachella Valley Multiple Species Habitat Conservation Plan (the CVMSHCP), a regional habitat conservation plan which balances conservation of rare and endangered species and development on an area-wide and regional basis under Section 6500 et. seq. of the Government Code. The Commission's members are the Cities of Cathedral City, Coachella, Desert Hot Springs, Indian Wells, Indio, La Quinta, Palm Desert, Palm Springs, Rancho Mirage, Coachella Valley Water District, Imperial Irrigation District, and Mission Springs Water District. Nonvoting participants of the Commission are Coachella Valley Association of Governments, Riverside County Flood Control and Water Conservation District, Riverside County Regional Parks and Open Space District and Riverside County Waste Management District.

The CVMSHCP is a long-term habitat conservation plan permitted by the California Department of Fish and Game as of September 9, 2008 and the United States Fish and Wildlife Services as of October 1, 2008 under the authority of the state and federal Endangered Species Acts. Although the Commission was formed as an independent joint powers authority prior to issuance of the state and federal permits for the CVMSHCP, it did not begin functioning as an independent agency until October 2008. With the approval of the CVMSHCP permits, funding for the activities of the Commission, including land acquisition, land management and biological monitoring, became available as of October 1, 2008.

With the CVMSHCP, over 240,000 acres of open space will be protected as well as 27 species of plants and animals that are threatened or facing extinction. The Commission acquired its 100,000th acre in October 2021. The Commission is also empowered to acquire land and administer grant programs to not-for-profit programs and permittees to conserve lands that contribute to the CVMSHCP's reserves, and to coordinate conservation easement agreements with landowners, seek grants and other funding sources to assist with acquisition, and coordinate with other state and federal acquisition programs in the CVMSHCP's area to ensure efficiency and consistency among acquisition programs. The basic financial statements of the Commission include all activities for which the Commission is financially accountable.

Major sources of revenue for the Commission include a Local Development Mitigation Fee collected on new development, tipping fees from Riverside County landfills, and regional infrastructure mitigation funds from various agencies, including the Coachella Valley Association of Governments, Coachella Valley Water District and Imperial Irrigation District. Other funding sources may be identified in subsequent years.

(b) Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information about the reporting government as a whole, except for its fiduciary activities. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on charges for services.

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 1: Summary of Significant Accounting Policies (Continued)

Likewise, the primary government (including its blended component units) is reported separately from discretely presented component units for which the primary government is financially accountable. The Commission has no business-type activities, fiduciary activities, or component units.

Certain eliminations have been made as prescribed by GASB Statement No. 34 in regard to interfund activities, payables, and receivables. All internal balances have been eliminated for purposes of the Statement of Net Position.

The Statement of Activities demonstrates the degree to which the direct expenses of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Other items not properly included among program revenues are reported instead as general revenues.

The underlying accounting system of the Commission is organized and operated on the basis of separate funds, each of which is considered to be a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues and expenditures or expenses, as appropriate. Governmental resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

Separate financial statements for the Commission's governmental funds are presented after the Government-wide Financial Statements. These statements display information about major funds individually and other governmental funds in the aggregate.

The Commission reports the following major governmental funds:

<u>General Fund</u> – This fund is used to account for all of the general revenues of the Commission not specifically levied or collected for special purposes, and for the expenditures related to the rendering of general services by the Commission.

<u>Management and Monitoring Special Revenue Fund</u> – This fund is used to account for the revenues associated with implementation of the land management program and the biological management program for the CVMSHCP. These programs are supported by grants and funds provided by various agencies to support implementation of the CVMSHCP.

<u>Land Acquisition Special Revenue Fund</u> – This fund is used to account for the revenues generated by the Local Development Mitigation Fee (LDMF) and mitigation contributions from various agencies. These revenues are used to support the acquisition of lands by the Commission on behalf of the Local Permittees to meet the goals of the CVMSHCP.

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 1: Summary of Significant Accounting Policies (Continued)

(c) Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The Government-wide financial statements are presented using the economic resources measurement focus and the accrual basis of accounting. Under the economic resources measurement focus, all (both current and long-term) economic resources and obligations of the reporting government are reported in the government-wide financial statements. Basis of accounting refers to when revenues and expenditures are recognized in the accounts and reported in the financial statements. Under the accrual basis of accounting, revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions are recognized when the exchange takes place. Revenues, expenses, gains, losses, assets, and liabilities resulting from nonexchange transaction are recognized in accordance with the requirements of GASB Statement No. 33.

When both restricted and unrestricted resources are available for use, it is the government's policy to use restricted resources first, then unrestricted resources as they are needed.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under the current financial resources measurement focus, only current assets and current liabilities are generally included on their balance sheets. The reported fund balance (net current assets) is considered to be a measure of "available spendable resources." Governmental fund operating statements present increases (revenues and other financing sources) and decreases (expenditures and other financing uses) in net current assets. Accordingly, they are said to present a summary of sources and uses of "available spendable resources" during a period. Noncurrent portions of long-term receivables due to governmental funds are reported on their balance sheets in spite of their spending measurement focus. However, special reporting treatments are used to indicate that they should not be considered "available spendable resources" since they do not represent net current assets. Recognition of governmental fund type revenue represented by noncurrent receivables is deferred until they become current receivables. Noncurrent portions of other long-term receivables are offset by fund balance reserve accounts.

Under the modified accrual basis of accounting, revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers revenues to be available if they are collected within 150 days of the end of the current fiscal period. Expenditures generally are recorded when a liability is incurred, except for principal and interest on long-term liabilities, claims and judgments, and compensated absences which are recognized as expenditures to the extent they have matured. Capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of long-term liabilities are reported as other financing sources.

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 1: Summary of Significant Accounting Policies (Continued)

Deferred Outflows/Inflows of Resources

In addition to assets, the statement of net position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net assets that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Commission does not have any items that qualify for reporting in this category.

In addition to liabilities, the statement of net position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net assets that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time.

The Commission has an item that qualifies for reporting in this category. Unavailable revenues, which arise only under a modified accrual basis of accounting, is reported only in the governmental funds balance sheet.

The governmental funds report unavailable revenues from one source. This amount is deferred and recognized as an inflow of resources in the period that the amounts become available.

Net Position Flow Assumption

Sometimes the government will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources.

In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide and proprietary fund financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the government's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

Governmental Fund Balances

Fund balances are reported in the fund statements in the following classifications:

<u>Non-spendable Fund Balance</u> — this includes amounts that cannot be spent because they are either not spendable in form (such as inventory) or legally or contractually required to be maintained intact (such as endowments).

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 1: Summary of Significant Accounting Policies (Continued)

Restricted Fund Balance — this includes amounts that can be spent only for specific purposes stipulated by constitution, external resource providers, or through enabling legislation. If the action limiting the use of funds is included in the same action (legislation) that created (enables) the funding source, then it is restricted. The accompanying financial statements include restricted fund balance for management and monitoring, land acquisition, and endowment. The CVMSHCP that created the funding source restricted the use of these funds for specific purposes.

<u>Committed Fund Balance</u> — this includes amounts that can be used only for the specific purposes determined by a formal action of the Commission. It includes legislation (Commission action) that can only be overturned by new legislation requiring the same type of voting consensus that created the original action. Therefore, if the Commission action limiting the use of the funds is separate from the action (legislation) that created (enables) the funding source, then it is committed, not restricted. The Commission considers a resolution to constitute a formal action of the Commission for the purposes of establishing committed fund balance.

<u>Assigned Fund Balance</u> — this includes amounts that are designated or expressed by the Commission but does not require a formal action like a resolution or ordinance. The Commission may delegate the ability of an employee or committee to assign uses of specific funds, for specific purposes.

<u>Unassigned Fund Balance</u> — this includes the remaining spendable amounts which are not included in one of the other classifications.

It is the Commission's policy that restricted resources will be applied first, followed by (in order of application) committed, assigned, and unassigned resources, in the absence of a formal policy adopted by the Commission.

(d) Reclassification and Eliminations

Inter-fund balances must generally be eliminated in the government-wide financial statements, except for net residual amounts due between governmental activities. Any allocations must reduce the expenses of the function from which the expenses are being allocated, so that expenses are reported only once - in the function in which they are allocated.

(e) <u>Cash and Investments</u>

The Commission pools cash and investments of all funds. Each fund's share in this pool is displayed in the accompanying financial statements as cash and investments. Investment income earned by the pooled investments is allocated to the various funds based on each fund's average cash and investment balance.

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 1: Summary of Significant Accounting Policies (Continued)

(f) <u>Capital Assets</u>

Capital assets are valued at cost where historical records are available and at an estimated historical cost where no historical records exist. Donated capital assets, donated works of art and similar items, and capital assets received as part of a service concession arrangement, are recorded at acquisition value at the date of acquisition. Generally, the Commission capitalizes assets with a cost in excess of \$5,000 with a useful life in excess of one year.

Capital assets used in operations are depreciated over their estimated useful lives using the straight-line method in the government-wide financial statements. Depreciation expense is charged as an expense against operations and accumulated depreciation is reported on the Statement of Net Position. The ranges of lives used for depreciation purposes for each capital asset class are as follows:

Equipment and Vehicles 2-12 years Land improvements 20-25 years Building and Improvements 50 years

(g) <u>Use of Estimates</u>

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenditures/expenses during the reporting period. Actual results could differ from those estimates.

(h) Comparative Financial Statements

Selected information regarding the prior year has been included in the accompanying financial statements. This information has been included for comparison purposes only and does not represent a complete presentation in accordance with generally accepted accounting principles. Accordingly, such information should be read in conjunction with the Commission's prior year financial statements, from which selected financial data was derived. The Commission has reclassified certain prior year information to conform with current year presentations.

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 2: Cash and Investments

Cash and investments of the Commission consisted of the following at June 30, 2025:

Cash and deposits:	
Deposits with financial institutions	\$ 2,146,276
Investments:	
Riverside County Pooled Investment Fund	16,545,997
CAMP Investment Fund	 22,017,208
Total cash and investments	\$ 40,709,481

Deposits

The Commission's deposits with financial institutions were insured or collateralized as required by State Law.

<u>Investments Authorized by the California Government Code and the Commission's Investment Policy</u>

The table below identifies the investment types that are authorized for the Commission by the California Government Code (or the Commission's investment policy, where more restrictive).

The table also identifies certain provisions of the California Government Code (or the Commission's investment policy, where more restrictive) that address interest rate risk, credit risk, and concentration of credit risk.

		Maximum	Maximum
	Maximum	Percentage	Investment in
Authorized Investment Type	Maturity	of Portfolio	One Issuer
United States Treasury Obligations	3 years	None	None
Money Market Mutual Funds investing in			
United States Treasury Investments	N/A	20%	10%
County Pooled Investment Funds	N/A	None	None
California Asset Management Program	N/A	None	None
Local Agency Investment Fund (LAIF)	N/A	None	None

Disclosures Relating to Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. Generally, the longer the maturity of an investment the greater the sensitivity of its fair value to changes in market interest rates. One of the ways that the Commission manages its exposure to interest, rate risk is by purchasing a combination of shorter term and longer term investments and by timing cash flows from maturities so that a portion of the portfolio is maturing or coming close to maturity evenly over time or coming close to maturity evenly over time as necessary to provide the cash flow and liquidity needed for operations. The Commission's investment in the Riverside County Pooled Investment Fund of \$16,545,997 and in the CAMP Investment Fund of \$22,017,208 is available on demand.

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 2: Cash and Investments (Continued)

<u>Disclosures Relating to Credit Risk</u>

Generally, credit risk is the risk that an issuer of an investment will not fulfill its obligation to the holder of the investment. This is measured by the assignment of a rating by a nationally recognized statistical rating organization. The Commission does not hold any investments subject to minimum credit ratings. The pooled investments held with the Riverside County Pooled Investment Fund and California Asset Management Program (CAMP) Pool Investment Fund are considered to be unrated.

Investment in Riverside County Investment Pool

The Commission is a voluntary participant in the County of Riverside Treasury Pool. The fair value of the Commission's investment in this pool is reported in the accompanying financial statements at amounts based upon the Commission's pro-rata share of the fair value provided by the County for the entire County portfolio (in relation to the amortized cost of that portfolio). The balance available for withdrawal is based on the accounting records maintained by the County.

Joint Power Authority Pools

The Commission is a voluntary participant in the California Asset Management Program (CAMP), a California Joint Power Authority that falls under the California Code Section 53601 (p), which is directed by a Board of Trustees that is made up of experienced local government finance directors and treasurers. The fair value of the Commission's investment in this pool is reported in the accompanying financial statements at amounts based upon the Commission's pro-rata share of the fair value provided by CAMP for the entire CAMP portfolio (in relation to the amortized cost of that portfolio).

Fair Value Hierarchy

The Commission categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. All Commission investments are not subject to fair value rating.

Note 3: Interfund Activities

<u>Transfers</u>

The General Fund transferred \$271,714 to the Management and Monitoring Special Revenue Fund to cover the deficit incurred in that fund.

Notes to the Basic Financial Statements

Biological monitoring and land management program

\$159,823

Note 5: Liability, Property and Workers' Compensation Protection Description

<u>Description of Self-Insurance Pool Pursuant to Joint Powers Agreement</u>

The Coachella Valley Conservation Commission is a member of the California Joint Powers Insurance Authority (the Authority). The Authority is composed of 125 California public entities and is organized under a joint powers agreement pursuant to California Government Code §6500 et seq.

The purpose of the Authority is to arrange and administer programs for the pooling of self-insured losses, to purchase excess insurance or reinsurance, and to arrange for group purchased insurance for property and other lines of coverage. The Authority began covering claims of its members in 1978. Each member government has an elected official as its representative on the Board of Directors. The Board operates through a nine-member Executive Committee.

Primary Self-Insurance Programs of the Authority

Each member pays an annual contribution at the beginning of the coverage period. The total funding requirement for self-insurance programs is based on an actuarial analysis. Costs are allocated to individual agencies based on payroll and claims history, relative to other members of the risk-sharing pool.

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 5: Liability, Property and Workers' Compensation Protection Description (Continued)

Primary Liability Program

Claims are pooled separately between police and general government exposures. (1) The payroll of each member is evaluated relative to the payroll of other members. A variable credibility factor is determined for each member, which establishes the weight applied to payroll and the weight applied to losses within the formula.

- (2) The first layer of losses includes incurred costs up to \$100,000 for each occurrence and is evaluated as a percentage of the pool's total incurred costs within the first layer.
- (3) The second layer of losses includes incurred costs from \$100,000 to \$500,000 for each occurrence and is evaluated as a percentage of the pool's total incurred costs within the second layer.
- (4) Incurred costs from \$500,000 to \$50 million, are distributed based on the outcome of cost allocation within the first and second loss layers.

The overall coverage limit for each member, including all layers of coverage, is \$50 million per occurrence. Subsidence losses have a sub-limit of \$50 million per occurrence. The coverage structure includes retained risk that is pooled among members, reinsurance, and excess insurance. More detailed information about the various layers of coverage is available on the following website: https://cjpia.org/coverage/risk-sharing-pools.

Adequacy of Protection

During the past three fiscal years, none of the above programs of protection experienced settlements or judgments that exceeded pooled or insured coverage. There were also no significant reductions in pooled or insured liability coverage in 2024-25.

Note 6: Future Funding

Per the 2011 Local Development Mitigation Fee Nexus Study, plan implementation costs include the direct and indirect costs associated with land acquisition, the Monitoring Program, and the Management Program, including Adaptive Management. Additional costs include staff costs associated with Plan Administration.

The estimated costs of Plan implementation for the permittees over the 75-year term are \$1,708,767,000. Revenue sources to fund these costs are as follows:

Local Development Mitigation Fee	\$1,212,881,000
Conservation Trust Fund	160,432,000
Regional Road Projects and	
Infrastructure Mitigation	100,814,000
Interest on Investments	234,640,000
Total Revenues	\$1,708,767,000

Notes to the Basic Financial Statements

Year ended June 30, 2025

Note 6: Future Funding (Continued)

In accordance with the CVMSHCP, Coachella Valley Association of Governments (CVAG) committed \$30 million of future Measure A funds, which would mitigate all the regional transportation projects listed in the current Transportation Project Prioritization Study (TPPS). Under the CVMSHCP, the \$30 million in the CVAG transportation funds would contribute to both land acquisition and the establishment of the Endowment Fund, which would ensure monitoring and management of the acquired lands. The CVMSHCP area includes 1.1 million acres, encompassing the entire Coachella Valley and the surrounding mountains. The CVMSHCP will benefit the local jurisdictions by providing Take Authorization for all development, including public infrastructure projects, undertaken by the Permittees (signatories to the MSHCP) outside the Conservation Areas.

By providing Take Authorization for public and private development projects, the MSHCP eliminates the need for individual biological surveys and negotiations for project mitigation with the U.S. Fish and Wildlife Service and the California Department of Fish and Game. At June 30, 2025, the outstanding commitment from CVAG is \$5,175,000. This commitment has not been recorded as a receivable because it has not met all the revenue recognition requirements.

Note 7: Related Party Transactions

The agreement between the Commission and Coachella Valley Association of Governments (CVAG) has undergone several amendments over the years, with the latest amendment approved by the CVCC and the CVAG Executive Committee in June 2023. This amended agreement sets a not-to-exceed contract amount based on the annual budget. For fiscal year 2024–2025, the amount shall not exceed \$1,683,141. During the period from July 1, 2024 through June 30, 2025, CVAG incurred on behalf of CVCC \$1,232,284. of staff time and allocated administrative expenses that were billed. As CVCC recognizes expenses on the accrual basis, an additional \$450,857 has been recorded as accrued costs. However, the final actual amount is expected to be lower than the accrued estimate.

Notes to Required Supplementary Information

Year ended June 30, 2025

Note 1: Budgets and Budgetary Accounting

The Commission adopts an annual budget prepared on the modified accrual basis of accounting for its governmental funds except for the Management Contingency, In-Lieu Fee, Lizard Endowment, Casey's June Beetle, and Travertine Point Monitoring Funds. The Executive Director or designee is authorized to transfer budgeted amounts between the accounts of any department. Revisions that alter the total appropriations of any fund are approved by the Commission's Board. Prior year appropriations lapse unless they are approved for carryover into the following fiscal year. Expenditures may not legally exceed appropriations at the fund level. Reserves for encumbrances are not recorded by the Commission.

Note 2: Excess of Expenditures over Appropriations

For the fiscal year ended June 30, 2025, expenditures exceeded appropriations in the General Fund by \$65,122 and in Land Acquisition Fund by \$80,467. However, in the Management and Monitoring Fund, expenditures were under appropriations by \$652,821.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Independent Auditor's Report

To the Commission Members Coachella Valley Conservation Commission Palm Desert, California

We have audited, in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States, the financial statements of the governmental activities, and each major fund of Coachella Valley Conservation Commission ("Commission"), as of and for the year ended June 30, 2025, and the related notes to the financial statements, which collectively comprise the Commission's basic financial statements, and have issued our report thereon dated December 18, 2025.

Report on Internal Control over Financial Reporting

In planning and performing our audit of the financial statements, we considered the Commission's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Commission's internal control. Accordingly, we do not express an opinion on the effectiveness of the Commission's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies and therefore, material weaknesses or significant deficiencies may exist that were not identified. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses or significant deficiencies may exist that have not been identified.

Report on Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Commission's financial statements are free from material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the financial statements. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

Purpose of this Report

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the entity's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

DavisFarrLLP

Irvine, California December 18, 2025

To the Commission Members Coachella Valley Conservation Commission Palm Desert, California

We have audited the financial statements of Coachella Valley Conservation Commission (Commission) as of and for the year ended June 30, 2025, and have issued our report thereon dated December 18, 2025. Professional standards require that we advise you of the following matters relating to our audit.

Our Responsibility in Relation to the Financial Statement Audit

As communicated in our engagement letter dated June 27, 2025, our responsibility, as described by professional standards, is to form and express an opinion about whether the financial statements that have been prepared by management with your oversight are presented fairly, in all material respects, in accordance with accounting principles generally accepted in the United States of America. Our audit of the financial statements does not relieve you or management of your respective responsibilities.

Our responsibility, as prescribed by professional standards, is to plan and perform our audit to obtain reasonable, rather than absolute, assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control over financial reporting. Accordingly, as part of our audit, we considered the internal control of the Commission solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

We are also responsible for communicating significant matters related to the audit that are, in our professional judgment, relevant to your responsibilities in overseeing the financial reporting process. However, we are not required to design procedures for the purpose of identifying other matters to communicate to you.

Planned Scope and Timing of the Audit

We conducted our audit consistent with the planned scope and timing we previously communicated to you.

Compliance with All Ethics Requirements Regarding Independence

The engagement team, others in our firm, and our firm have complied with all relevant ethical requirements regarding independence.

We identified self-review threats to independence as a result of non-attest services provided. Those non-attest services included the preparation of the financial statements and recording journal entries detected during the audit process. To mitigate the risk, management has compared the draft financial statements and footnotes to the underlying accounting records to verify accuracy and has reviewed a disclosure checklist to ensure footnotes are complete and accurate.

Additionally, we utilize a quality control reviewer to perform a second review of journal entries and the financial statements. We believe these safeguards are sufficient to reduce the independence threats to an acceptable level.

Significant Risks Identified

During the planning of the audit, we identified the risk of errors in recording land purchases as a significant risk. As a result, we reviewed 65% of total purchases, and we reviewed the minutes of the Board to ensure all purchases, including donated land, have been recorded properly.

Qualitative Aspects of the Entity's Significant Accounting Practices

Significant Accounting Policies

Management has the responsibility to select and use appropriate accounting policies. A summary of the significant accounting policies adopted by the Commission is included in Note 1 to the financial statements. As described in Note 1 to the financial statements, the Commission changed accounting policies regarding risk disclosures related to government vulnerabilities due to concentrations and constraints by adopting Statement of Governmental Accounting Standards (GASB Statement) No. 102, Certain Risk Disclosures. No matters have come to our attention that would require us, under professional standards, to inform you about (1) the methods used to account for significant unusual transactions and (2) the effect of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus.

Significant Accounting Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's current judgments. Those judgments are normally based on knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ markedly from management's current judgments.

The most sensitive accounting estimates affecting the financial statements were:

• Estimates involving estimated acquisition value of donated land. We evaluated the key factors and assumptions used to develop certain estimates in determining that they are reasonable in relation to the financial statements taken as a whole.

We evaluated the key factors and assumptions used to develop these estimates in determining that they are reasonable in relation to the financial statements taken as a whole.

The financial statement disclosures are neutral, consistent, and clear.

Financial Statement Disclosures

Certain financial statement disclosures involve significant judgment and are particularly sensitive because of their significance to financial statement users. The most sensitive disclosures affecting the Commission's financial statements relate to: Note 4 Capital Assets.

Significant Unusual Transactions

For purposes of this communication, professional standards require us to communicate to you significant unusual transactions identified during our audit. There were no significant unusual transactions identified as a result of our audit procedures.

Identified or Suspected Fraud

We have not identified or have obtained information that indicates fraud may have occurred.

Significant Difficulties Encountered during the Audit

We encountered no significant difficulties in dealing with management relating to the performance of the audit.

Uncorrected and Corrected Misstatements

For purposes of this communication, professional standards also require us to accumulate all known and likely misstatements identified during the audit, other than those that we believe are trivial, and communicate them to the appropriate level of management. Further, professional standards require us to also communicate the effect of uncorrected misstatements related to prior periods on the relevant classes of transactions, account balances or disclosures, and the financial statements as a whole and each applicable opinion unit. We did not identify any uncorrected financial statement misstatements.

In addition, professional standards require us to communicate to you all material, corrected misstatements that were brought to the attention of management as a result of our audit procedures. We did not identify any material misstatements as a result of our audit procedures.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a matter, whether or not resolved to our satisfaction, concerning a financial accounting, reporting, or auditing matter, which could be significant to Commission's financial statements or the auditor's report. No such disagreements arose during the course of the audit.

Circumstances that Affect the Form and Content of the Auditor's Report

For purposes of this letter, professional standards require that we communicate any circumstances that affect the form and content of our auditor's report. There were none noted.

Representations Requested from Management

We have requested certain written representations from management, which are included in the letter dated December 18, 2025.

Management's Consultations with Other Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters. Management informed us that, and to our knowledge, there were no consultations with other accountants regarding auditing and accounting matters.

Other Significant Matters, Findings, or Issues

Other Matters

In the normal course of our professional association with CVCC we generally discuss a variety of matters, including the application of accounting principles and auditing standards, significant events or transactions that occurred during the year, operating and regulatory conditions affecting the entity, and operational plans and strategies that may affect the risks of material misstatement. None of the matters discussed resulted in a condition to our retention as CVCC's auditors.

This report is intended solely for the information and use of the Commission Members and management of the Commission and is not intended to be and should not be used by anyone other than these specified parties.

Coachella Valley Conservation Commission Finance Committee January 5, 2026

STAFF REPORT

Subject: Budgetary Impacts Related to Burrowing Owl Coordination and Research

Contact: Kathleen Brundige, Director of Land and Habitat Conservation

(kbrundige@cvag.org)

<u>Recommendation</u>: To address the concerns related to the burrowing owl and provide any coordination with wildlife agencies:

- 1) Authorize a \$300,000 adjustment to the Fiscal Year 2025-26 budget to address immediate research needs, anticipated legal expenses and administrative expenses related to burrowing owl management; and
- 2) Approve Amendment No. 2 to the Services Contract with Dr. Conway's laboratory at the University of Idaho, providing an additional \$292,489.15 to the contract and extending burrowing owl monitoring activities through December 2026

<u>Background</u>: At the November 13 meeting, staff provided an update on the significant progress achieved in burrowing owl monitoring and management under the Coachella Valley Multiple Species Habitat Conservation Plan (CVMSHCP). The CVCC remains committed to the CVMSHCP's objectives of conserving regional biodiversity and ensuring the long-term viability of the western burrowing owl. In recent months, CVCC staff has been in coordination with Permittees to respond to a formal letter that U.S. Fish and Wildlife Service and the California Department of Fish and Wildlife issued on September 19, 2025 to raise compliance concerns related to the western burrowing owl (BUOW). CVCC staff takes these concerns with the utmost seriousness. Staff are actively coordinating with both wildlife agencies to ensure compliance with permit obligations and are working collaboratively with Permittees to address the issues raised.

The research needs and administrative expenses related to this effort, including legal fees, is now prompting CVCC staff to recommend an amendment to an existing contract and authorization to adjust the existing budget to account for expected expenses.

As part of the Fiscal Year 2025–2026 Annual Work Plan, a comprehensive survey of the Coachella Valley was required to confirm the persistence of the burrowing owl population. In 2025, biologists from the Imperial Irrigation District (IID) and AECOM conducted a region-wide census, expanding upon methodologies used in the 2009 and 2011 surveys.

In July 2025, staff was contacted regarding a multi-state genetic analysis of burrowing owls in the western United States, coordinated through Colorado State University. Staff were referred to Dr. Courtney Conway's laboratory at the University of Idaho for blood and tissue collection. Dr. Conway, a recognized expert with extensive publications on burrowing owls, and his team conducted banding and sampling from August through December, building upon IID survey locations.

The original scope of work included sampling at least 100 owls across CVCC and partner-owned conservation lands, as well as levees, berms, and dikes within Riverside Flood Control, IID, and

Coachella Valley Water District (CVWD) service areas. These efforts support banding surveys and DNA analysis to inform long-term conservation strategies, including population viability, demographics, and resident versus transient owl dynamics.

To ensure continuity, staff recommend expanding the scope and budget of the University of Idaho contract to retain Dr. Conway's team through the 2026 breeding season. This extension will allow for ongoing nest monitoring, banding, and collection of blood and tissue samples for future genetic analysis. Additionally, legal fees are expected to increase in Fiscal Year 2025–26 due to the potential listing of burrowing owls in California and ongoing discussions with wildlife agencies regarding permit requirements and compliance.

<u>Fiscal Analysis</u>: The total requested budget increase is \$300,000, with this fiscal year's expenses offset by transfers from other funds. To fund this, staff recommends:

- An increase of \$200,000 to the Fiscal Year 2025–2026 Management and Monitoring Fund to support burrowing owl monitoring through June 2026; and
- An increase of \$100,000 in administrative and legal fees to address immediate permit compliance issues.

Much of the funding will go to research led by Dr. Conway's laboratory. The original contract was approved at a not-to-exceed amount of \$99,900.11 through December 31, 2025. In December 2025, with approximately \$15,000 remaining on the contract, CVCC's Executive Director authorized Amendment No. 1 to extend the contract at no additional cost through 2026. CVCC staff now recommends an increase of \$292,489.15 to the contract to support the expanded scope of work through December 2026. Staff is anticipating any work occurring after July 2026 will be factored into the Fiscal Year 2026-27 budget when it goes to the Commission for approval.

This item will be presented to the full Commission when it meets on January 8.

COACHELLA VALLEY CONSERVATION COMMISSION AMENDMENT #2 TO THE RESEARCH AGREEMENT NO. CVCC-26-005 WITH

The Regents of the University of Idaho on behalf of Dr. Conway's Lab for the project:

"Movements and Productivity of Burrowing Owls in Coachella Valley"

Institution: Regents of the University of Idaho

Project Leader: Dr. Courtney Conway

Address: 875 Perimeter Drive MS 3020, Moscow, ID 83844-3020

Project title: Movements and Productivity of Burrowing Owls in Coachella Valley

Project Period: 28 July 2025 to 31 December 2025: extended through December 31, 2026

Effective Date of Amendment: January 8, 2026

Funding: USD \$99,900.11: add \$292,489.15 for a total not to exceed \$392,389.26

This research agreement is between the Coachella Valley Conservation Commission, hereinafter referred to as CVCC and **Regents of the University of Idaho**, hereinafter referred to as UIDAHO, is amended in the following particulars and no others.

1. On the Research Agreement title page, add \$292,489.15 for a total not to exceed \$392,389.26 to the Funding:

"add \$292,489.15 for a total not to exceed \$392,389.26"

2. Include **ATTACHMENT A. SCOPE OF WORK** for the additional funding in the amount not-to exceed \$292,489.15 as amended in the Research Agreement title page to the Funding.

The undersigned, as authorized representatives of the UIDAHO and CVCC, respectively, certify the establishment of Amendment #2 to the Research Agreement.

CVCC: Regents of the University of Idaho

Signature: Signature:

Name: Tom Kirk Name: Sarah S. Martonick

Title: Executive Director, CVCC Title: Director, Office of Sponsored Programs

Date: Date:

ATTACHMENT A. SCOPE OF WORK

Movements and Productivity of Burrowing Owls in Coachella Valley

Burrowing Owls (*Athene cunicularia*) were once a common breeder in grasslands and deserts throughout the western U.S. and Canada. Burrowing Owl populations have declined, and the species has been extirpated from areas on the western, northern, and eastern periphery of their breeding range (Conway & Pardieck 2006, Macías-Duarte & Conway 2015, Conway 2018a). Burrowing Owls are now federally endangered in Canada (COSEWIC 2017), and are listed by the U.S. Fish and Wildlife Service as a Species of National Conservation Concern in the United States (USFWS 2021). Moreover, Burrowing Owls were recently petitioned for state listing in both California and Washington and the California Fish and Game commission designated Burrowing Owls as a candidate species in March 2024 which provides full California ESA protections. Burrowing Owls are commonly found nesting and wintering along berms of irrigated agricultural fields (Conway et al. 2006, Conway 2018b) including those in Imperial and Coachella Valleys (Bartok and Conway 2010). Furthermore, Burrowing Owls are often adversely affected by accelerating land use change in the areas they rely on (e.g., flat grasslands, shrublands, and deserts with deep soil). In California, the Imperial and Coachella Valleys support a high proportion of remaining burrowing owls in the state. Hence, the persistence and stability of Burrowing Owls in the Coachella Valley plays an oversized role in the persistence, listing status, and conservation of Burrowing Owls in California.

The status of Burrowing Owls in the Coachella Valley has varied over the past 35 years. In the 1990s, no Burrowing Owls were detected while during visits to historically occupied nest sites throughout the valley and the investigators believed that owls had been extirpated from the Coachella Valley (USFWS 2003). During surveys from 2003-2007, ~33 owls were detected throughout the valley (Darnell). During surveys from 2009-2011, ~40 pairs were detected (Rotenberry et al. 2010, Coachella Valley Conservation Commission 2014). The Burrowing Owl Conservation Strategy in the MSHCP for Coachella Valley calls for systematic surveys of appropriate burrowing owl habitat within the Conservation Areas to better determine distribution and abundance of Burrowing Owls and to inform whether a goal of >16 pairs is being met. To achieve that goal, we will visit locations where burrowing owls were detected during AECOM (IID) surveys and we will search those areas to locate nest burrows based on telltale signs at burrow entrances (Garcia and Conway 2009, Smith and Conway 2011). We will also opportunistically search for owls throughout suitable habitat as we travel to and from areas where owls were detected by recent surveys. At each presumed nest burrow that we locate, we will perform observations to determine the breeding status of the owls and phenology of breeding events. We will use spotting scopes and binoculars to carefully check for leg bands at each location where we detect owls. If bands are observed, we will record the sequence of colored and metal bands, record the band number (when possible), and record the GPS location of each nest and satellite burrow for inclusion on a map. We will revisit each nest site at least twice each week, from initial identification through fledging of the last juvenile (i.e., 30 days old). At a subset of nest sites, we will install motion-activated wildlife cameras, positioned to capture the burrow entrance, to document fate of nesting attempts, brood sizes, identity of nest predators, causes of nest failures, and prey delivery rates (to document whether those correlated with nesting productivity metrics). We will check the cameras and replace their memory cards at least every 3-4 days. These data will provide detailed estimate of reproductive success, fledging rates, and how those metrics vary across the Coachella Valley and the factors that influence reproductive success in the vallev.

We will trap, measure, and band all adult and juvenile Burrowing Owls possible at each active nest site. We will use walk-in box traps (modified Havahart traps), bow nets, and other standard trapping techniques to capture owls. Previously-unbanded owls will receive a unique band combination to allow for future identification without handling. The methods outlined above have been used successfully to document annual changes in abundance, fecundity, nest-site locations and identify causes of declines in other populations (e.g., Conway et al. 2006, Lundblad et al. 2021). Dispersal behavior of Burrowing Owls varies regionally (Holroyd et al. 2011, Macías -Duarte and Conway 2021) and dispersal behavior and migratory behaviors are affected by local food and parasite loads (Ogonowski and Conway 2009, Garcia et al. 2024); marking breeding owls will allow us to document immigration and emigration of owls and local movements. We will compare reproductive metrics with those from other populations throughout the species' range (Conway et al. 2012) to gauge the relative health of Burrowing Owl populations in Coachella Valley. Burrowing Owls are relatively common in other areas of California and the extent to which owls move amongst those areas is important information for designing an effective Burrowing Owl management plan for recovery. Hence, we will capture and mark owls in other areas in California. We will collect blood and feather samples from all captured owls for genetic analyses and to assess the effects of agricultural practices on genetic structure (Macías-Duarte et al. 2020).

Deliverables

Monthly Updates: We will provide quarterly updates to CVCC.

<u>Data Products</u>: We will provide all data collected in tabular database formats (i.e., MS EXCEL or ACCESS) and spatial data as GIS ESRI shapefiles. We will provide GIS-generated map(s) depicting the locations of all occupied owl burrows.
